# WEATHER

## WEATHER SYNOPSIS BY REGION:

### NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

#### **Eureka Weather:**

Coastal low clouds and fog will return tonight with partial afternoon clearing again tomorrow. Interior locations will remain clear for the next several days. Cooling temperatures will arrive late week along with the possibility of some light rain for the weekend.

#### **Medford Weather:**

Gusty south and southwest winds are expected in the Shasta Valley and areas of the east side again this afternoon, focused over Modoc County on the east side and near Weed in the Shasta Valley. Humidities and winds combined are not expected to reach Red Flag criteria.

#### **Reno Weather:**

High pressure will bring warm temperatures with typical late day winds through Thursday. Low pressure will move into the Pacific Northwest this weekend and bring cooler temperatures and periods of gusty winds.

#### **San Francisco Weather:**

Warmer temperatures are expected today and tomorrow as high pressure builds into California from the Desert Southwest. An upper level trough will bring in cooler temperatures as well as a slight chance of rain to northern California late Friday into Saturday.

# WEATHER

## **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:**

### **Sacramento Weather:**

Dry weather with daytime temperatures a little above normal are predicted through the end of the week. Cooler temperatures can be expected beginning over the weekend with a chance of showers over the northern portion of the state. A little below normal daytime highs will continue through most of next week.

### **Hanford Weather:**

Mainly dry weather can be expected for the next several days. Temperatures will remain near to slightly above normal as the upper-level ridge lingers through much of the week. Cooler weather returns for the weekend with the arrival of a low pressure system.

## **SOUTHERN CALIFORNIA:**

### **Los Angeles Weather:**

Some lingering monsoonal moisture will bring a slight chance of thunderstorms to the eastern mountains and deserts this afternoon. A large upper level ridge will bring a warming trend today and Thursday with well above normal temperatures continuing into Friday. An upper trough moving into the Pacific Northwest over the weekend will bring a cooling trend Saturday through early next week.

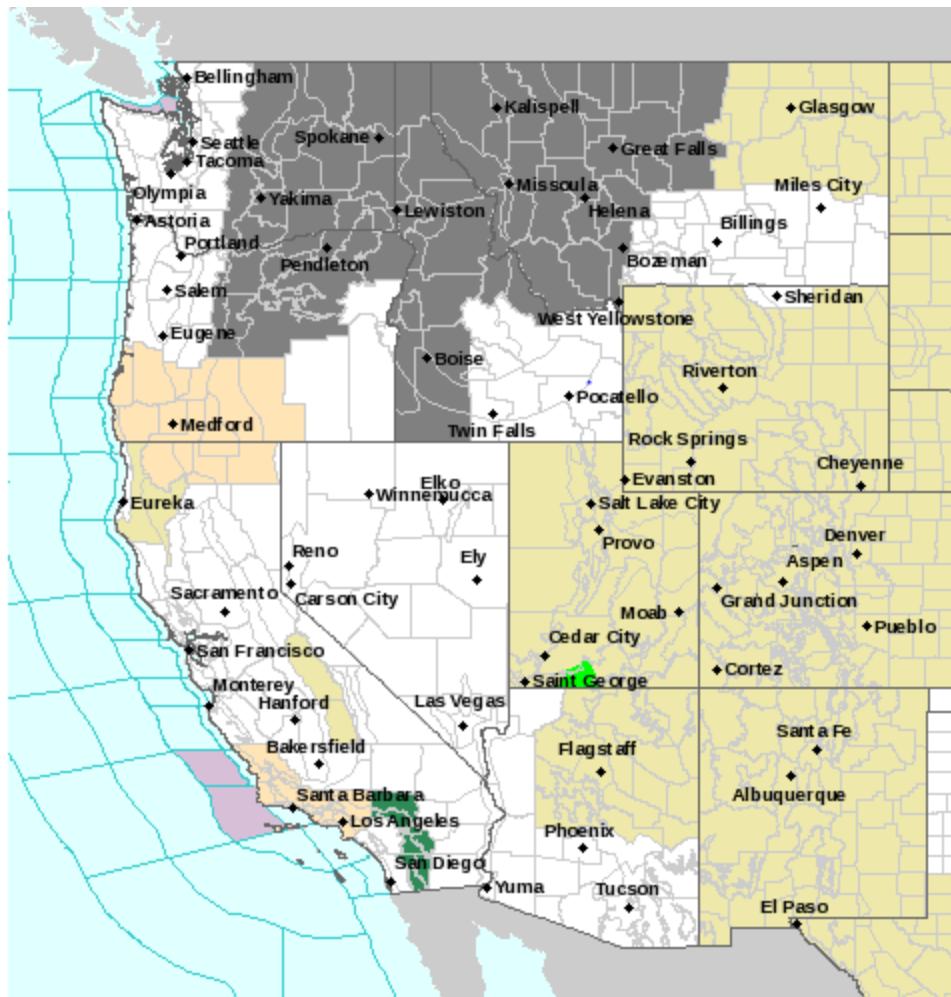

### **Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

Monsoonal moisture will bring a chance of thunderstorms to the mountains and deserts today with occasional heavy rain possible. Fewer clouds will result in warmer temperatures for most areas today. Drier air from the southwest will move through southeastern California Thursday and Friday and bring fair dry weather with hot conditions for the inland areas.

### **Southeast California Weather:**

There will be enough moisture remaining today for another round of showers and thunderstorms affecting mainly eastern San Bernardino County. Thunderstorm chances will decrease Thursday with additional drying expected Friday through the weekend as an increasing southwest flow becomes established.
